Summary

Information and Communication Engineering graduate with hands-on experience in Software application development, Linux server infrastructure and enterprise IT operations. Skilled in translating technical requirements into reliable production services, managing web deployments, and building automated internal tools. Seeking opportunities to apply strong systems knowledge, database management, and cross-functional coordination to drive scalable, stable technology solutions.

Education

B.Sc. in Information and Communication Engineering (BICE) 2022 to 2026
Bangladesh University of Professionals (BUP) — CGPA: 3.58 / 4.00 *Dhaka, Bangladesh*

Higher Secondary Certificate (HSC), Mirpur Cantonment Public School & College — *GPA 5.00* 2021

Secondary School Certificate (SSC), Monipur High School & College — *GPA 5.00* 2019

Experience

IT Intern May 2026 to Present
Startup Bangladesh Limited *Dhaka, Bangladesh*

- Coordinated directly with external vendors to manage deployment workflows, server migrations, and migration compliance of website.
- Engineered internal applications for automation and contributed to national platforms, including the IMM Platform and NSEP Platform.
- Provisioned enterprise Linux server environments, managing system health, service continuity, and access controls.
- Managed daily technical support, automated reporting spreadsheets, and streamlined hardware and IT asset procurement processes.

Key Projects

Ki Oushodh
Edge-AI Offline Medicine Identifier | *Flutter & Google ML Kit*

- Engineered an offline Edge-AI mobile application utilizing Google ML Kit for zero-latency optical character recognition (OCR).
- Designed a 5-tier fuzzy search algorithm to query a local NoSQL database of 13,929 pharmaceutical brands.
- Integrated on-device Text-to-Speech (TTS) to provide accessible audio feedback for low-literacy and elderly users.

BUP Bus Tracker
Live Transit Logistics Application | *Flutter & Firebase*

- Co-developed a real-time logistics tracking system utilizing Flutter and Firebase to optimize campus transportation.
- Deployed and maintained a dual-client mobile ecosystem handling live location streams, utilized daily by university commuters.

Research & Academic Work

Undergraduate Thesis: Data Centre Reliability Optimization BUP
EXPLORING THE POTENTIAL OF SECONDARY RELIABILITY FACTOR OPTIMISATION TO REDUCE THE RELIABILITY GAP BETWEEN TIER III AND TIER IV DATA CENTRES WHILE MAINTAINING ENERGY EFFICIENCY *2025 – 2026*

- Investigated secondary reliability factor optimization to bridge the operational gap between Tier III and Tier IV data centres while preserving energy efficiency.

Technical Skills

- **Languages & Frameworks**: Python, JavaScript, Dart, C/C++, Flutter, Laravel, HTML/CSS
- **Systems & Infrastructure**: Ubuntu Server, Plesk Panel, Git/GitHub, VirtualBox
- **Databases & Operations**: SQL, MySQL, Firebase, NoSQL, Power BI, Microsoft Office, Google Workspace

Leadership & Extracurriculars

- **Senior Vice President, BUP Robotics Club**: Directed operations for Circuit Clash 1.0, the club's flagship national robotics competition, and represented BUP at regional tournaments.
- **Web Administrator, BICE Academic Portal**: Developed and maintained the central academic resource portal on Google Sites for 4 years, serving 200+ students and faculty members.
- **Media Coordinator, IEEE BUP Student Branch**: Spearheaded digital archives, public media, and technical coverage for IEEE Branch Fest and the 2nd ICICT4SD.
