Summary

Information and Communication Engineering graduate from Bangladesh University of Professionals with hands-on experience in enterprise IT support, Linux/Windows system administration, network troubleshooting, and operational coordination. Experienced in managing cloud suites, vendor communication, IT procurement documentation, and user acceptance testing. Combines hardware diagnostic expertise with analytical reporting to keep systems reliable and efficient.

Education

B.Sc. in Information and Communication Engineering — CGPA: 3.58 / 4.00
Bangladesh University of Professionals (BUP), 2026 — *Dhaka, Bangladesh*

Higher Secondary Certificate (HSC), Mirpur Cantonment Public School & College, 2021 — GPA 5.00

Secondary School Certificate (SSC), Monipur High School & College, 2019 — GPA 5.00

Experience

IT Intern — May 2026 – October 2026
Startup Bangladesh Limited — *Dhaka, Bangladesh*

- Provided enterprise IT support across the organization, diagnosing and resolving hardware and software issues.
- Coordinated with external vendors and internal management on the website migration to ensure compliance, IT asset procurement audits, warranty tracking, and technical documentation.
- Conducted User Acceptance Testing, bug tracking, and quality assurance for national platforms (IMM and NSEP), and deployed internal workflow tools including SBL Card Scanner.
- Administered Ubuntu Linux server environments and managed user accounts.

Key Projects

BUP Bus Tracker — Flutter, Firebase, Google Maps API
Real-Time Campus Transit & Logistics Platform

- Co-developed and deployed a live campus transit tracking solution with separate driver and student applications, enabling real-time GPS vehicle tracking and route updates on Google Play and Web.

Ki Oushodh — Flutter, Google ML Kit OCR, Hive
Offline Medicine Identification & Accessibility System

- Built an offline Android accessibility application using on-device OCR and Bengali/English Text-to-Speech to identify medicines, backed by a local NoSQL database of 13,929 brand entries and 1,640 generics with sub-350 ms query times.

Research & Academic Work

Undergraduate Thesis: Data Centre Reliability Optimization
Exploring the Potential of Secondary Reliability Factor Optimisation to Reduce the Reliability Gap Between Tier-III and Tier-IV Data Centres While Maintaining Energy Efficiency

- Analyzed secondary operational parameters (cooling switchover latency, power path transfer, thermal limits, and preventive maintenance) using industrial proxy data and local facility surveys to reduce downtime gaps without increasing Power Usage Effectiveness.

Leadership & Extracurriculars

- **Senior Vice President, BUP Robotics Club**: Organized operations for Circuit Clash 1.0, managing event logistics, technical setups, and vendor coordination. Represented BUP in regional RoboSoccer tournaments.
- **Web Administrator, BICE-22 Academic Portal**: Built and maintained the central academic resource portal on Google Sites for 4 consecutive years, serving 400+ students and faculty.
- **Media Coordinator, IEEE BUP Student Branch**: Managed technical documentation, digital publications, and event media operations for the 2nd ICICT4SD conference and IEEE Branch Fest.

Technical Skills

- **IT Systems & Hardware**: Windows, Ubuntu Linux, Microsoft 365, Google Workspace, PC Assembly & Diagnostics, Router/LAN & Printer Troubleshooting
- **Operations & Project Support**: Requirement Gathering, UAT & Quality Assurance, Vendor Coordination, Procurement & Technical Documentation
- **Data & Technical Tools**: Power BI, Excel, SQL, MySQL, Git/GitHub, CMS, HTML/CSS, Python, Flutter, AI-Assisted Prototyping
